AUTHOR INDEX

Bessems, Eugene
Some Microbiological Problems of Fabrics Coated With Plasticized PVC, p. 26

Brauer, Diana P.
Ignitability of Fabrics and Fabric/Cushion Systems, p. 37
Treated Viscose Fibers: Effect of SandOFlam 5060 On Pyrolysis Gas Toxicity, p. 260

Camilleri, Louis T.
Polyurethane Latex Coatings An Alternative to Solvent Emissions, p. 101

Davis, Mark A.
Technical Coating Methods and Applications, p. 52

Fewell, Larry L.
Fire Resistivity and Toxicity Studies of Candidate Aircraft Passenger Seat Materials, p. 217

Gasparrini, Frank J.
One Hundred Percent Solids Polyurethanes, p. 3.
Formulation Requirements for Urethane-Fabric Coatings, p. 195

Gupta, B. S.
Solventless Fabric Coating by Radiation Curing Part IV: Transfer Coatings on Non-Wovens, p. 12

Hauser, Edward
A Survey of Possible Approaches to Garment Warmth Evaluation, p. 161

Hilado, Carlos J.
Ignitability of Fabrics and Fabric/Cushion Systems, p. 37
Effect of Piloting on Ignitability of Aircraft Interior Fabrics, p. 83
Smoke from Fabric-Cushion Systems, p. 155
Ignitability by Radiant Heat of Furniture Upholstery Fabrics, p. 173
The Measurement of Smoke from Coated Fabrics, p. 247
Treated Viscose Fibers: Effect of SandOFlam 5060 on Pyrolysis Gas Toxicity, p. 260

Ivey, Lee R.
Coatings, Solvents and the Laws in the 1980's, p. 254

Jackson, Casey A.
Polyurethane Latex Coatings An Alternative to Solvent Emissions, p. 101

McLafferty, John J.
Polyurethane Latex Coatings An Alternative to Solvent Emissions, p. 101

McPeters, W. S.
Solventless Fabric Coating by Radiation Curing Part IV: Transfer Coatings on Non-Wovens, p. 12

Murphy, Regina M.
Effect of Piloting on Ignitability of Aircraft Interior Fabrics, p. 83
The Measurement of Smoke from Coated Fabrics, p. 246

Nathanson, Charles
Changing Coatings with Changing Times, p. 87
Textile Coatings, Present and Future, p. 94

Noble, Stephen
Fiberglass Screening, p. 147

Pitman, Donald B.
Many Uses of PVC Coated Polyester Yarns, p. 138

Santaniello, Anthony
Chemistry of Non-Solvent Containing Polyurethane Coating Systems, p. 269

Sparling, Eleanor L.
The Effects of Xenon-Arc Radiation on Gore-Tex Laminates, p. 75

Tripp, E. P. III
Electron Processing: Is the Industry Ready?, p. 110

Turner, Peter L.
New Developments in Cotton Canvas, p. 122

Walsh, W. K.
Solventless Fabric Coating by Radiation Curing Part IV: Transfer Coatings on Non-Wovens, p. 12

Wilcock, Ann E.
The Effects of Xenon-Arc Radiation on Gore-Tex Laminates, p. 75

Worrall, James D.
Coated Foam Yarns: A New Concept for Textile Specialties, p, 149

Waugh, Stuart D.
Tarpaulins and Truck Covers – A Market Analysis, p. 287

SUBJECT INDEX

Aircraft Seat Materials, Selection
Fire Resistivity and Toxicity Studies of Candidate Aircraft Passenger Seat Materials, p. 217

Applications
Technical Coating Methods and Applications, p. 52

Biocides, as PVC Additives
Some Microbiological Problems of Fabrics Coated with Plasticized PVC, p. 26

Coated Fabrics
Electron Processing: Is the Industry Ready?, p. 110

Coated Fabrics, Microbiological Problems
Some Microbiological Problems of Fabrics Coated with Plasticized PVC, p. 26

Coated Fabrics, Plasticized PVC
Some Microbiological Problems of Fabrics Coated with Plasticized PVC, p. 26

Coated Yarn
Coated Foam Yarns: A New Concept for Textile Specialties, p. 149

Coating Methods
Technical Coating Methods and Applications, p. 52

Coatings and Solvents, Legal Implications
Coatings, Solvents and the Laws in the 1980's, p. 254

Compliance Costs
Changing Coatings with Changing Times, p. 87

Compression
Solventless Fabric Coating by Radi-

ation Curing Part IV: Transfer Coatings on Non-Wovens, p. 12

Conservation and Recovery Act
Changing Coatings with Changing Times, p. 87

Cotton Canvas, New Developments
New Developments in Cotton Canvas, p. 122

Cotton Tarps
New Developments in Cotton Canvas, p. 122

Electron
Electron Processing: Is the Industry Ready?, p. 110

Electron Processing
Electron Processing: Is the Industry Ready?, p. 110

Electron Curing
Electron Processing: Is the Industry Ready?, p. 110

Energy
Electron Processing: Is the Industry Ready?, p. 110

Fabric Coating
Solventless Fabric Coating by Radiation Curing Part IV: Transfer Coatings on Non-Wovens, p. 12

Fabrics, Ignitability
Ignitability of Fabrics and Fabric/Cushion Systems, p. 37

Fabric Spinoffs
Technical Coating Methods and Applications, p. 52

Fiberglass Screening, Manufacture of
Fiberglass Screening, p. 147

Finishing
Electron Processing: Is the Industry Ready?, p. 110

Flocking
Electron Processing: Is the Industry Ready?, p. 110

Fluorocarbon Film
The Effects of Xenon-Arc Radiation on Gore Tex Laminates, p. 75

Formulation, urethane fabric coatings
Formulation Requirements for Urethane Fabric Coatings, p. 195

Garment Warmth Evaluation
A Survey of Possible Approaches to Garment Warmth Evaluation, p. 161

Gore-Tex
The Effects of Xenon-Arc Radiation on Gore-Tex Laminates, p. 75

Ignitability of Aircraft Fabrics
Effect of Piloting on Ignitability of Aircraft Interior Fabrics, p. 83

Ignitability of Fabrics
Ignitability of Fabrics and Fabric/Cushion Systems, p. 37

Latent Foam
Coated Foam Yarns: A New Concept for Textile Specialties, p. 149

Methods of Coating
Solventless Fabric Coating by Radiation Curing Part IV: Transfer Coatings on Non-Wovens, p. 12

Non-Solvent Urethane Coatings
Chemistry of Non-Solvent Containing Polyurethane Coating Systems, p. 269

Non-Wovens
Solventless Fabric Coating by Radiation Curing Part IV: Transfer Coatings on Non-Wovens, p. 12

Outerwear
The Effects of Xenon-Arc Radiation on Gore-Tex Laminages, p. 75

Pigment Printing
Electron Processing: Is the Industry Ready?, p. 110

Polytetrafluoroethylene
The Effects of Xenon-Arc Radiation on Gore-Tex Laminates, p. 75

Protective Clothing, FR Cotton Canvas
New Developments in Cotton Canvas, p. 122

Polyester Yarns, PVC Coated
Many Uses of PVC Coated Polyester Yarns, p. 138

PVC Coated Polyester Yarns
Many Uses of PVC Coated Polyester Yarns, p. 138

Radiant Heat Ignitability, of Upholstery
Ignitability by Radiant Heat of Furniture Upholstery Fabrics, p. 173

Radiation
Electron Processing: Is the Industry Ready?, p. 110

Radiation Curing
Solventless Fabric Coating by Radiation Curing Part IV: Transfer Coatings on Non-Wovens, p. 12

Sandoflam 5060 Flame Retardant
Treated Viscose Fibers: Effect of Sandoflam 5060 on Pyrolysis Gas Toxicity, p. 260

Scientific Approach
Technical Coating Methods and Applications, p. 52

Smoke From Fabric
Smoke from Fabric-Cushion Systems, p. 155

Smoke Measurement, Coated Fabrics
The Measurement of Smoke from Coated Fabrics, p. 246

Solid Waste Handling
Textile Coatings, Present and Future, p. 94

Specialty Coatings
Technical Coating Methods and Applications, p. 52

Stimuli
Technical Coating Methods and Applications, p. 52

Tarps and Truck Covers, Markets
Chemistry of Non-Solvent Containing Polyurethane Coating Systems, p. 287

Teflon
The Effects of Xenon-Art Radiation on Gore-Tex Laminates, p. 75

Tents
The Effects of Xenon-Arc Radiation on Gore-Tex Laminates, p. 75

Thermal Resistance, Measurement
A Survey of Possible Approaches to Garment Warmth Evaluation, p. 161

Thermography of Clothing
A Survey of Possible Approaches to Garment Warmth Evaluation, p. 161

Toxic Substances Act – Implications
Changing Coatings with Changing Times, p. 87
Textile Coatings, Present and Future, p. 94

Treated Viscose Fibers
Treated Viscose Fibers: Effect of SandOFlam 5060 on Pyrolysis Gas Toxicity, p. 260

Ultraviolet Radiation
The Effects of Xenon-Arc Radiation on Gore-Tex Laminates, p. 75

Urethane Fabric Coatings
Formulation Requirements for Urethane Fabric Coatings, p. 195

Urethanes, 100% Solids
One Hundred Percent Solids Polyurethanes, p. 3

Urethane Latex Coatings
Polyurethane Latex Coatings An Alternative to Solvent Emissions, p. 101
